PROJECTS

Task Buddy
Flutter · Dart · Shared Preferences

- Developed a full-featured productivity suite with category management and local database persistence.
- Engineered a secure OTP-based authentication flow and a dynamic theme-switching engine.
- Designed a high-performance UI/UX with integrated mini-games to boost user engagement.
- Applied advanced state management patterns for a scalable, responsive mobile architecture.

Spotify Clone
HTML · CSS · JavaScript

- Built a responsive music streaming interface using Vanilla JavaScript and modern CSS techniques.
- Implemented custom logic for real-time audio controls, seekbar synchronization, and volume handling.
- Delivered a mobile-first dark-mode design optimized for cross-browser compatibility.

Twitter (X) Clone
HTML · Tailwind CSS

- Architected a high-fidelity frontend clone of the Twitter platform using utility-first Tailwind CSS.
- Replicated complex tweet layouts, navigation sidebars, and trending topic widgets with pixel precision.
- Focused on clean code principles and rapid, fully responsive styling components.

ACHIEVEMENTS

- **Finalist** — BLACKBOX AI: *Trick The System* at **RIT TechFest 2026**.
- Maintained a **9.65 CGPA** — among the top academic performers within a competitive engineering cohort.

EXTRACURRICULAR ACTIVITIES

- Technical workshops and competitive coding hackathons.
- School Marching Band member.
- Live vocal performance and music enthusiast.
