PROFESSIONAL SUMMARY

Information Science Engineering undergraduate (9.65 CGPA) at Ramaiah Institute of Technology with proven expertise in architecting full-stack web platforms using Next.js 14, React, Node.js, and enterprise systems with Java, PostgreSQL, and JDBC. Experienced in Razorpay fintech payment workflows, normalized relational database schemas, multi-threaded application design, and secure OAuth architectures.

EXPERIENCE

Hewlett Packard Enterprise (HPE) July 2026 – Present
Career Preview Program (CPP2) Intern Bangalore, India

- Participating in the Career Preview Program, gaining hands-on exposure to enterprise software development lifecycles and HPE's edge-to-cloud architecture.
- Shadowing senior engineering teams in an Agile environment to assist in designing, testing, and debugging scalable software solutions, aiming to improve system efficiency by 15%.

EDUCATION

Ramaiah Institute of Technology 2024 – 2028
Bachelor of Engineering in Information Science & Engineering — CGPA: 9.65 / 10.0 (Top Performer in ISE) Bangalore, India

Jnana Sudha PU College 2022 – 2024
Pre-University Education (Class XII - PCMB) — Aggregate: 97.3% Karnataka, India

TECHNICAL SKILLS

Languages: Java, C, C++, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
Frameworks & UI: Next.js 14, React.js 18, Node.js, Express.js, Java Swing, JDBC, Tailwind CSS, Web Audio API
Databases & Systems: PostgreSQL (Relational Design), MongoDB (Atlas & Mongoose), MySQL, Firebase RTDB
Tools & Security: Git, GitHub, VS Code, Razorpay API, NextAuth.js (OAuth 2.0), Postman, Rolling-Hash Security
CS Fundamentals: Data Structures & Algorithms (DSA), Relational DBMS, Concurrency & Multithreading, OOP

FEATURED PROJECTS

Get-Me-Chai — Creator Crowdfunding & Patronage Platform **Live App | GitHub**
Next.js 14, React 18, Razorpay API, MongoDB Atlas, Mongoose, NextAuth, Tailwind CSS

- Architected a full-stack creator patronage platform enabling supporters to fund creators via secure Razorpay payment gateway integration with server-side HMAC-SHA256 signature verification and webhooks.
- Integrated NextAuth.js for OAuth 2.0 authentication, dynamic creator profile dashboards, and responsive glassmorphic UI using Tailwind CSS with celebratory particle physics animations.
- Engineered high-throughput MongoDB Atlas schemas with Mongoose models for instant transaction ledgers, real-time patron comments, and creator revenue aggregation pipelines.

SurakshaSetu — Digital Identity & Trust Management System
Java, PostgreSQL, JDBC, Swing, Multithreading, Relational Architecture

- Architected a digital identity and trust management platform for gig economy workers utilizing a 15-table normalized PostgreSQL database, maintaining 100% data integrity across concurrent transactions.
- Implemented a custom mathematical trust score algorithm factoring consistency, ratings, and income, persisting score changes via atomic database transactions and comprehensive audit trails.
- Developed a multi-threaded GUI application featuring role-based access control (RBAC) and custom rolling-hash security without external libraries, minimizing application dependency overhead.

Spotify Web Clone & X (Twitter) Clone — Interactive Web Applications **Spotify Demo | Twitter Demo**
JavaScript (ES6+), HTML5 Audio, Web Audio API, Tailwind CSS, Responsive Design

- Constructed a responsive Spotify web player with real-time audio playback, seekbar scrubbing, volume modulation, song queue navigation, and mobile-first dark mode styling.
- Recreated Twitter/X platform UI with utility-first Tailwind CSS, featuring fluid responsive sidebars, tweet layouts, and trending widgets.

ACHIEVEMENTS & TECHNICAL PARTICIPATION

- Participant — Google x DeepStation x MSRIT Hackathon (May 2026): Participated in hackathon organized by Dept. of CSE (AI&ML / Cyber Security); completed intensive technical workshop exploring emerging tools.
- Finalist — BLACKBOX AI: Trick The System at RIT TechFest 2026: Selected as finalist among 50+ participants in a competition focused on testing and identifying vulnerabilities in AI logic systems.
- Top Academic Performer (9.65 CGPA) — Maintained highest percentile ranking within the Information Science Engineering cohort at RIT.
